

KALDEWEI

NEW ICONS

2015/16

**WE ALWAYS
CHOOSE OUR
OWN PATHS –
NEW ONES.**

We strive to question, rethink and continuously develop everything. We set this standard both for ourselves and equally for our products. As a result, the focus of our activities is not only on individual products but on groundbreaking bathroom solutions. From design to completed project, we are a worldwide partner to our clients for all their design wishes – delivering objects of consummate beauty for the bathroom which are distinguished by their timeless design, daring individuality, and superb quality. This has given rise to true style icons – made from proven KALDEWEI steel enamel and created for unique bathrooms.

In the following pages we present you not only with our latest bathtub and shower surface models, but KALDEWEI also introduces you to an entirely new product segment. We have commissioned internationally renowned designers to develop washstands made of high-quality KALDEWEI steel enamel. These perfectly complement our existing programme. Furthermore, they produce an overall composition in the bathroom that is entirely harmonious thanks to the use of a single design vocabulary and material.

I hope that you will enjoy discovering our many exciting innovations, and I wish you just as much pleasure with our new brand image that once again underlines our high standards of quality. Meanwhile, we will be getting back to work again so that we can continue presenting you with new products and well-thought-out developments.

NEW THIS YEAR.
JUST LIKE NEW IN 30 YEARS.

Washbasins need to be exceptionally robust because there is no other object in the bathroom that is so heavily used. For this reason alone, we only ever considered one material for our washbasins: the same one with which the proven bathtubs and shower surfaces by KALDEWEI are made – KALDEWEI steel enamel. KALDEWEI steel enamel is extremely scratch and shock-resistant, it

withstands all standard household detergents and chemicals, it is easy to clean, and exceptionally hygienic. We are confident that you too will be convinced by this material's special qualities. That is why, as with all other KALDEWEI products, our new washbasins come with a 30-year warranty.

All new washbasins are online too

PERFECTION CANNOT BE IMPROVED.
BUT IT CAN BE EXTENDED.

The KALDEWEI steel enamel ensures that our baths and shower surfaces, and now our new washbasins too, are made to last. But KALDEWEI steel enamel recommends itself not only for its material properties; its aesthetic qualities deliver equally strong arguments. Designed to let you enjoy the advantages of bathroom furniture made

completely of the same material, the new washbasins now complement our baths and shower surfaces in the most optimal way. Experience the beautiful feeling when individual perfect objects combine into a perfect whole: a bathroom in one style, one quality and one class.

THE NEW WASHBASINS

MADE FOR HIGH STANDARDS – AND FOR ETERNITY.

DESIGN

The family relationship with the CONO bathtubs and shower surfaces cannot be overlooked: Made of superb KALDEWEI steel enamel, the aesthetic quality and user-friendliness of these washbasins combine to produce the perfect symbiosis of clarity and serenity. The square, enamelled outflow accentuates the underlying geometry

of this sublime washbasin. In addition to its exceptional design, it captivates with a special technical feature: the overflow is invisibly integrated into the run-off support. There is no overflow hole to detract from the design's clean lines. The CONO washbasin thus exudes perfect elegance and harmony.

DESIGN

Anke Salomon. The minimalism and simple elegance of the CENTRO bathtub family have been transferred here to the washbasins. Taking the circle as the basic shape, a very special geometry was produced – with soft radii and flowing contours. Apart from the round enamelled waste cover and the invisible overflow, the generous

dimensions of the washbasin surround are particularly striking. These lend the washbasin a distinctive character that stands out both in modern bathroom settings and traditional interiors – irrespective of which fittings you choose.

DESIGN

Anke Salomon. The sensually modern design of the SILENIO series of washbasins distinguishes itself through its exciting tensions: The soft, organic interior shape culminates in a narrow, precise washbasin lip – with a straight-lined, geometrical external shape. This, combined with the unadorned surround, produces a

restrained yet extraordinary washbasin. The SILENIO product series offers the washbasin to go with the SILENIO Ambiente bathtub. Together with the SCONA shower surface, they form a harmonious bathroom, fitted out entirely with KALDEWEI steel enamel.

Design that isn't for just anybody can't be produced by just anybody either. That is why we have asked the illustrious designer, Arik Levy, to design his first bathroom collection for KALDEWEI.

ocean a visual experience, as if one were part of it. As if one were looking at the sea not at a distance, from the shoreline, but actually swimming in it. Like a surfer waiting for the next wave.

Arik Levy's work is famed for its emotional power. It not only makes people's lives easier, but also enriches them. Because it bestows happiness, pleasure and wellbeing on them. That is how Arik Levy interprets excellent design – and that is exactly what he has achieved with his MEISTERSTÜCK EMERSO. The sea was his inspiration for this design. The idea is that his tub should make the

The interior shape and external trim combine to produce a wave; the extraordinary edge curves in on itself, lending the design a touch of undulance. Everything merges together to create an impressive bathroom sculpture with lines that seem to flow infinitely. Like the sea: without symmetry but full of harmony.

DESIGN

Arik Levy. The MEISTERSTÜCK EMERSO washbasin is the counterpart to the bathtub of the same name. Although built inversely, its design is equally subtle and harmonious. The washbasin's flowing lines appear to undulate; the internal shape of the washbasin seems to

dissolve the boundaries between solid and liquid. Even the flush-fitting outflow is positioned in such a way that it reinforces the impression of a fluid shape. Whether freestanding or recessed, the MEISTERSTÜCK EMERSO is an enhancement to even the most luxurious bathroom.

DESIGN

Arik Levy. Designed for a single bather, the MEISTERSTÜCK EMERSO bathtub is a luxury to be enjoyed entirely by oneself. Ergonomics and design are at one with each other in this freestanding bathtub. The new kind of fluid design

with its undulating bathtub rim provides a natural and comfortable place to rest one's head. The tapering fully-enamelled outer shape underlines the bathtub's sculptural nature, giving it the look of a modern work of art.

“INSPIRED BY THE BEST DESIGNER IN THE WORLD – NATURE.”

MEISTERSTÜCK INCAVA

SILENIO

Anke Salomon's design vocabulary stands apart because of its unmistakable aesthetic: clear-cut, pure and full of beauty – just like nature. Anke Salomon remains faithful to her design philosophy in her collaboration with KALDEWEI. Three product lines have been created: the freestanding MEISTERSTÜCK INCAVA bathtub, a recessed version of the INCAVA, and the SILENIO Collection comprising a bathtub and washbasin. We met the illustrious designer and spoke to her about the new bathroom collection.

Ms. Salomon, you designed several products for KALDEWEI. What is special about the design?

Anke Salomon: “The three product lines share a common design vocabulary that is natural and soft. Starting from a clearly defined edge, the material flows gently downwards with no visible rims or corners, and with no geometric orientation. The individual models differ from each other, however, thanks to distinctive design features. With the freestanding MEISTERSTÜCK INCAVA bathtub, the material flows directly from the outer rim to the interior. The wall of the tub appears very narrow, so that the interior seems all the more spacious. Combined with the conical exterior shape, the bathtub exudes an incredible lightness. The recessed INCAVA bathtub captivates with its

unusual corner radii. The bathtub's high, striking rim surrounds it like a picture frame, setting it apart from the architecture around it. The SILENIO bathtub, on the other hand, appears peaceful and integrative thanks to its very flat tub edge and exceptionally precise corner radii. The accompanying SILENIO washbasin picks up on the flowing, soft design of the product line, and its dimensions appear very lavish.”

What is the idea behind the design of the new KALDEWEI products? Was there something that inspired you?

Anke Salomon: “The design vocabulary is harmonious, sensual and unadulterated. The soft contours of the interior space flow as naturally as a cloth that, hanging freely, forms a harmonious, gentle hollow. This nature-oriented aesthetic combined with long-lasting, solid KALDEWEI steel enamel produces an extremely exciting arrangement of design and material.”

What design challenges did you face in working with KALDEWEI steel enamel?

Anke Salomon: “What is special about the material is the high aesthetic quality and, at the same time, its unique durability. Because of the longevity of steel enamel, the design cannot be governed by passing trends but must continue to give pleasure for many, many years. At the same time, the design must possess a new and strong character, as well as that certain something – a challenging task.”

What does collaboration with KALDEWEI mean for you?

Anke Salomon: “While working with KALDEWEI, I got to know a team there who, demonstrating a love of their product, a passion for their material, steel enamel, and a huge awareness of quality, are dedicated to creating bathroom products. Naturally, for me as a designer, that is a fantastic environment. I am very pleased to have the opportunity of working with this team on designing high-quality objects that will delight people for many years to come.”

DESIGN

Anke Salomon. The charm of the freestanding MEISTERSTÜCK INCAVA lies in the subtle tension between the soft lines of the interior and the sensual geometry of the exterior. The reduced rim and con-

cally-shaped trim give the bathtub a surprising lightness. The design is perfected by the centrally-placed, flush-fitting, enamelled waste cover and the newly devised enamelled overflow.

MEISTERSTÜCK INCAVA
(Model No. 1174) in Alpine White

MODEL	MODEL NO.	LENGTH (cm)	WIDTH (cm)	DEPTH (cm)
MEISTERSTÜCK INCAVA	1174	175	76	43.5

DESIGN

Anke Salomon. The recessed version for the highly discerning. The narrow, precise wall of the tub surrounds the organically soft interior shape like a picture frame. The height of the edge is generous, the corner radius significantly rounder than in other KALDEWEI bathtubs. This lends the INCAVA Avantgarde a strikingly sculptural

look, setting it apart from the rest of the bathroom architecture. In contrast, the flush-fitting waste cover and the newly devised overflow – both made of KALDEWEI steel enamel – are superbly integrated. They round out the sensation of profound serenity and harmony created by the interior of the bathtub.

INCAVA
(Model No. 174) in Alpine White

THE MEISTERSTÜCKE

PURE RELAXATION - IN A PURE DESIGN.

**PLENTY OF SPACE.
FOR YOUR IDEAS AS WELL.**

KALDEWEI MEISTERSTÜCKE aim to make your bathroom into a unique place. And that's another reason why they can be placed anywhere in the bathroom. Be it free-standing, wall-mounted or in a corner – they can fulfil just about any wish. In keeping with this thinking, we

offer special versions of our MEISTERSTÜCKE with two or three-sided trim. The exquisite look is retained: fully-enamelled and seamless. This means that even those models that are not freestanding still preserve their clean-cut, minimalist lines.

DESIGN

Sottsass Associati, Milan. The seamless shape of the MEISTERSTÜCK CONODUO combines freestanding design with excellent bathroom comfort to produce the perfect symbiosis of clarity and serenity. The precisely executed perpendicular bathtub cladding, the flush-fitting, recessed outflow, and the optimally positioned overflow knob are all made of superb KALDEWEI steel

enamel, and accentuate the coherent look in the bathroom. Two identical back slopes and the centrally positioned outlet ensure a very special bathing experience – be it alone or à deux. For those who would like even more space in the bathtub, we now also offer a 180 x 80cm version.

THE NEW
SHOWER SOLUTIONS

FLEXIBLE, FLAT AND EASY.

FLEXIBLE

A large selection of colours, sizes and installation products ensures that KALDEWEI always has the right solution that leaves little to be desired.

FLAT

With the highest standards to the lowest level – representing the combination of low profile showering surfaces with an innovative waste fitting.

EASY

Floor-level showers are easier to install than you think. We offer the right installation solution for almost any situation: quick to install and optimally matched to the KALDEWEI shower surfaces.

SHOWERING AT THE HIGHEST LEVEL: FLOOR-LEVEL.

The standards of modern bathroom design are high: The preferred shower solution today is floor-level, easy to install and integrates flexibly in different room situations. A trend which KALDEWEI has helped to shape and continues to advance. It is for this purpose that we have

developed complete integrated systems. These innovative combinations of shower surface, waste fitting and installation system do not just meet standards – they set them: with excellent design, durability and straightforward installation.

DESIGN

Made of superior KALDEWEI steel enamel using state-of-the-art technology the shower creates a unique feel-good atmosphere in the bathroom. Its geometric shape with square radii follows modern lines. Round details and

the slight sloping of the shower surface stand in striking contrast. Its sensuous design flows harmoniously into a round waste cover positioned in dead centre.

SUPERPLAN: from 75x80cm to 100x180cm

THE HIGH ART OF FITTING SHOWER SURFACES ULTRA FLAT.

The demand for floor-level showers in new buildings and renovations is high. Low floor screed thickness can often be a problem. That is why KALDEWEI has developed a new generation of patented waste fittings – the innovative KA 90. Depending on the required drainage capacity

and the thickness of the floor screed, you can choose from four models. Combined with the flat-fitting, enamelled shower surfaces, this is a good solution for floor-level installation.

Schematic diagram of the SCONA with KA 90

KA 90

- Fitting height of only 81mm incl. waste cover
- Horizontal connection
- Drainage capacity 0.9l/s
- Connection diameter of 50mm
- Conforms to DIN EN 274 with 50mm water seal
- Total height with SCONA of only 103mm

KA 90 EXTRA FLAT

- Fitting height of only 70mm incl. waste cover
- Horizontal connection
- Drainage capacity 0.8l/s
- Connection diameter of 50mm
- Does not conform to DIN EN 274 with 30mm water seal
- Total height with SCONA of only 92mm

KA 90 ULTRA FLAT

- Fitting height of only 61mm incl. waste cover
- Horizontal connection
- Drainage capacity 0.8l/s
- Connection diameter of 40mm
- Does not conform to DIN EN 274 with 30mm water seal
- Total height with SCONA of only 83mm

KA 90 VERTICAL

- Fitting height of only 81mm incl. waste cover
- Vertical connection
- Drainage capacity 1.4l/s
- Connection diameter of 50mm
- Conforms to DIN EN 274 with 50mm water seal
- Total height vertically (with floor-level waste fitting) of only 49mm

INSTALLATION – AS EASY AS SHOWERING ITSELF.

How to get a floor-level shower in quick and straightforward steps: The KALDEWEI installation systems make light work of most installation situations. Be it under-structure, shower surface or sealing: all components

are perfectly matched – making the installation clear and straightforward. Fitting a shower is convenient and effortless.

INSTALLATION SYSTEM

We offer you the right system for almost any installation situation. Everything from one source – everything perfectly matched.

SHOWER SURFACE

The shower surface in the required size is placed onto the assembled installation system. Its integrated slope ensures perfect drainage – reducing complex screed work and tiling.

SEALING, SOUND INSULATION & MORE

The KALDEWEI PROFESSIONAL range lets you customise the installation of the shower surface to suit the client's requirements. The special waste fittings, SILENCE PLUS sound insulation solutions, sealing systems and more offer complete peace of mind.

CUT DOWN ON TIME AND EFFORT: THE INSTALLATION SYSTEMS BY KALDEWEI.

The basis for fast and easy installation is an assembly system that takes structural conditions into consideration and adapts to them accordingly on-site. To this end,

we offer no fewer than three assembly solutions. In this way KALDEWEI shower surfaces are installed both at floor level and with the greatest of ease.

ESR II INSTALLATION SYSTEM

The proven system for floor-level installation: The integrated sealing system protects against damage from moisture penetration. The innovative waste fittings with anti-seepage connection additionally guarantee a low fitting height.

SHOWER TRAY FOOT FRAME FR 5300

A flexible system for optimum fit with only three sizes for the diversity of dimensions of enamelled shower surfaces from KALDEWEI. Because the frames are simply cut to the required size.

POLYSTYRENE SUPPORT

The fast system for flat installation. Perfectly matched to shower surfaces, the support provides full surface stability. Even renovations are easy and straightforward.

SKIN TOUCH

THE FABLED FOUNTAIN OF YOUTH.
IN CONTEMPORARY DESIGN.

THE MOST IMPORTANT ADDITIVE FOR YOUR BEAUTY BATH: AIR.

With SKIN TOUCH you feel even more at home in your skin. Because this new system transforms the KALDEWEI Avantgarde and Ambiente bathtubs into veritable fountains of youth. Tiny bubbles of air, 50 to 100 times smaller than in a whirl bath, flow out of a jet. The concen-

tration of oxygen in your bathwater is thus increased – taking it up to as much as 70% above the normal level. This microfine pearl effect relaxes and regenerates. The result: After bathing your skin feels even smoother and softer.
